Ryan,

It's Dr. Yamada not Mr. Yamada

Aside from my smart Alec response, your response is excellent.

Richard

Hi all, just wanted to circle back on this – do you think you'll be able to get me something? We want to be sure to give you adequate time to respond – I can talk with my editor about deadline if you think you'll need more time.

Subject: IRIS & formaldehyde assessment

Hi all, I am working on a story about the delayed IRIS formaldehyde assessment and the broader fight over the IRIS program. Could you get me comment on a few things? Filing by COB today.

-Administrator Pruitt told Senate EPW at the end of January that it was his understanding that the formaldehyde assessment was complete. Why has the report not been released?

-Have political officials prevented the assessment from going through the necessary internal review? I have 2 sources who say that politicals, including Ryan Jackson & Richard Yamada, have inserted themselves into the process and cancelled briefings.

-The sources say the report finds that formaldehyde is linked with leukemia and other ailments at very low dosages, levels that most Americans are exposed to on a daily basis. Has this finding been changed?

-ACC says it has met regularly with EPA about the assessment, including a meeting at EPA on January 24. Who attended this meeting?

-Are other IRIS assessments being held up?

-What role has Nancy Beck played in the IRIS program since coming to EPA?

Feel free to give me a ring on my cell if you want to discuss. Thanks –

Annie
